BESPOKE ENQUIRES

About Dresser Mouldings - The History

Dresser originally formed in the early 1980s by one of the current directors. The company having established its identity, commanding respect within the specialist Architectural market. During 2009 the Dresser business split & a new company was formed from its present Location in Rochdale. This enabled the business to relaunch with existing ideas and bring in new skills to a much larger site.

The new site included assembly line facilities, vacuum and spray coating paint lines, CNC bespoke machinery along with all of the traditional products associated with Dresser Mouldings. It is clear the changes have helped dresser refocus & expand its core business but at the same time make the necessary changes to take dresser forward, focusing in on people & technology skills & at the same time offer a much wider service to its core product range.

About Us

- **Our expertise is all about manufacturing.**
- **The key to our success is the belief that detail matters.**
- **We have the experience know-how on a vast range of Engineered products.**
- **We have continued to reinvest in our core staff.**
- **We have continued to reinvest in new technology**
- **We are FSC and PEFC certified**
- **We are ISO9001 compliant.**
- **We are a complete one stop shop.**

Vacuum & Spray coaters

From manufacturing to coatings, Dresser Mouldings is known for offering the best products on the market.

- We specialise in both external and internal paints, stains, lacquers and primers
- All our applications are water borne environmentally friendly wood finishes to optimise performance and durability.
- We work with all leading paint manufacturers including, Teknos, Akzo Nobel, Sansin, Morrell's, Owatrol and Anker stuy.
- We offer full factory finishes including all timbers end sealed, all goods packed & protected with additional end seal touch up paint for site application as standard.
- Dresser offer full technical support and publish a number of guide documents along with technical specifications from all leading paint suppliers.
- We are one of the leading manufacturers of timber claddings, we offer a wide range of services including fully finished coatings along with pre finished panels for site assembly.
- We offer a full range of film build and saturation coatings fully finished in either translucent or opaque shading.
- We can offer a wide range of sanded, brushed, band sawn & rustic finishes when applying a range of non-film saturation coating.

Vacuum & Spray coaters

Our coatings facilities & services are unrivalled, we provide a fully controlled factory finishing for both external & internal coatings. We maintain complete control & integrity of the quality processes & are able to deliver a complete finish ready for installation.

Our Vacuum line applies a full factory finish to timber either by Lacquering, staining or priming. A vacuum coater works by applying the paint to all 4 sides. A combination of heat, vacuum pressure & feed speed will determine the build & the quality of the finish.

On completion all goods are sealed using the manufactures end seal, goods are packed in protected crates & each layer separated for protection, all despatched goods will carry a full site guide for storage & installation along with touch up paint & on-site end seal for any cut section on site.

Our automatic spray line gave us the opportunity with new cutting-edge Technology to offer quality finished systems. The finishing line allows hand fed products up to 300mm wide. The spray machine is fitted with two separate spray circuits which enable fast colour changes; the line is able to deal with MDF, softwood & hardwood timbers & in accordance with our environmental policy, the new automatic coating line is designed to run exclusively with water-based paints & lacquers.

Our automatic spray-line can provide small bespoke runs & is used for both Internal & external market for water based lacquered finishes including tinted lacquers on Oak, Ash Beech & other hardwood & softwood species.

Bespoke Profiling

Design:

We boast a fully equipped drawing room, with our specialist team Dresser can turn your ideas into reality. From bespoke profiles to complex CNC work

Tooling:

We have an extensive library of period and bespoke designs, backed up by the latest CAD + design packages.

Machining:

Our range of manufacturing capabilities include the facility to manufacture up to 230mm wide, we can also offer a wide choice of off the shelf profile along with an unlimited range of bespoke designed tooling to fit your project needs. Our range of timbers includes solid and engineered timbers. Many of the Manufactured products are taken for further processing, either CNC, drilling, notching mitring, assembly & finishing, we offer a true one stop shop. Our experience ensures products with high value processes are specially crated & protected to avoid damage during transportation. Our flexibility allows us to machine & prepare small & large quantities; this is supported with a range of straight-line edging & multi rip machines allowing hardwood timbers to be pre-straightened before being manufactured.

Bespoke Servicing

Laminating:

Our Taylor Press allows us to laminate a wide range of products including Accoya, plus many hard & softwoods species. Laminating is carried out within a controlled heated area, this is essential to the curing of any glues used. We continually upgrade our glues & use all the latest gluing techniques to achieve a wide range of applications including newels & associated products. Our press has a maximum length capacity of 5 metres with a maximum width capacity of 900mm wide & a maximum thickness of 150mm.

Door Apertures:

We offer a full range of services from producing beads finished in length to full assembly using the latest Hoffman automatic saw, we are able to produce a range of dovetailed joints fully assembled before finishing either of our spray of vacuum machine, lacquered, primed or stained

Sanding / Brushing:

At Dresser we believe in investing in the future, that's why we have invested in the latest brushing techniques. We offer a wide range of Sanded and Brushed finishes; this can enhance any design. We also have very practical uses when Coating. From offering a smooth sanded finish to a rustic heavy brushed effect, Dresser Mouldings can offer it all.

Turning:

With our on-site joinery shop and fully qualified staff we can offer bespoke turnings in different timber species. From spindles, turned newels and columns, We can make it all.

CNC Facilities

We currently have 2 CNC machines, a 3 axis SCM and a 5 axis Maka combining all the latest technology with full auto CAD.

Our design team are able to produce full modelling and design advice.

CAD Design:

Our CAD design team have worked on high-profile projects involving complex design to solar shading down to standard drilling.

Complex Components:

Whether it's drilling or more complex curving, our CNC specialist trained staff can create an abundance of design taken from most CAD drawings we are able to convert into a range of drawings to suit the software, creating components to a high degree of accuracy, see our range of Projects.

Assembly:

Having a full assembly facility including bonding presses enables us to build up complex designs ready to be designed into complex shapes for further details contact our professional sales & design team.

Bespoke Timber Columns

Columns:

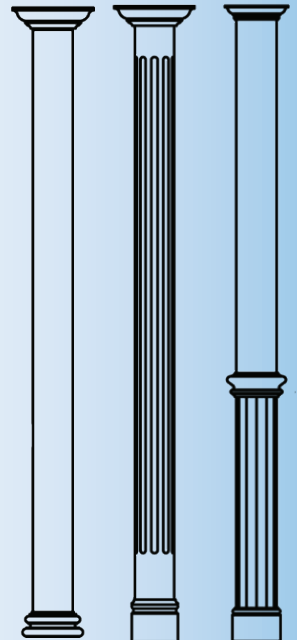

The profiles shown correspond to standard mouldings the dimensions can be found on the relevant page. Dresser columns can also be manufactured in a number of hardwood finishes.

Column Specification:

CL8	200mm Diam
CL12	305mm Diam
CL18	457mm Diam
CL24	610mm Diam
CL30	762mm Diam

Columns can be supplied with split lines

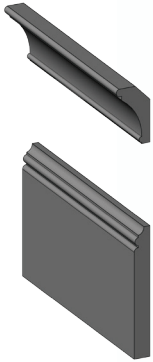

Variations available: Plain Fluted R&B

Kitchen & Bar Range

Kitchen & Bar Range:

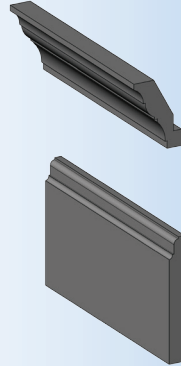

Classic

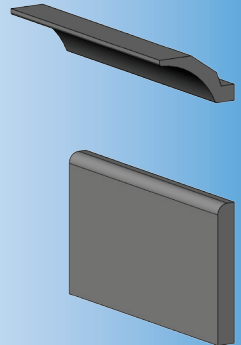

Colonial

Georgian

Shaker

We also offer corner blocks at 50mm 65mm 90mm for the Cornice and Skirting above . Skirting is 60mm x 21mm. This range is available in Poplar and Oak.

Quadrant

50mm

60mm
