

# Morrells

**omnia** is the latest innovation from Morrells. A true breakthrough in coatings for exterior joinery set to revolutionise the market..

Morrells is synonymous with market-leading product development, manufacture and supply of specialist finishes for wood and has over 105 years provenance in British business. Morrells sure-footed environmental policy emanates from our manufacturing facility and network of 25 branches throughout the UK and Ireland.

What really sets Morrells apart is the commitment to excellence in understanding and supporting our customer base. We bespoke colour-match 1000's of products each week and always have qualified technical consultants on hand to assist and guide all our customers on finishing matters.

**omnia** by Morrells offers 10 years protection against the elements as long as timber selection, preparation and design meet TWA scheme\* criteria & requirement standards, and the application of the coatings are in accordance with the appropriate Morrells product data and/or specification. Very exposed or coastal locations can reduce the longevity of all exterior coatings. For this reason annual inspections and maintenance must be carried out.

HIGH PERFORMANCE WATERBORNE COATINGS FOR **EXTERNAL JOINERY**

# Morrells have gone one step further...

Wood has been an important construction material since humans began building shelters and houses.

The strength, versatility and renewable nature of timber makes it the most obvious choice for today's windows, doors and conservatory construction. When we choose wood, we choose the sustainable, eco-friendly option but we also choose a surface that requires protection. Modern micro-porous coatings give wooden joinery not only the flexibility of colour and sheen but also durable protection against the elements.

- **Ultra-clear natural topcoats**
- **Ultra-smooth coloured topcoats**

a breakthrough in aqueous polymer technology with 2 distinct features.

**omnia**

exterior joinery coatings

# Clear finishing

Once in a generation a finish like this becomes available... something very special. At last you can now give your customers a natural wood finish that will withstand the British weather... and look good for years.

Wood needs to move and breathe just like us!

It takes a remarkable outer coating to protect our doors & windows against harmful UV rays, penetrating frost, lashing rain and rot attack. Morrells have developed an ultra clear high performance coating system for exterior joinery and subjected it to years of accelerated weather conditioning to prove it will last... a true technological breakthrough.

**OMNIA PRESERVE** IS SPRAYED WET WITH ANY EXCESS WIPED OFF AFTER A COUPLE OF MINUTES. ALSO SUITABLE FOR DIPPING AND FLOW-COATING.

**OMNIA CLEAR** IS SPRAYED USING AAA EQUIPMENT TO A MINIMUM OF 150 MICRONS WET FILM THICKNESS PER COAT.

FOR FACTORY FINISHING ONLY.

THE APPROPRIATE RESPIRATORY PROTECTION MUST BE WORN DURING APPLICATION AND ALL HEALTH & SAFETY REQUIREMENTS MUST BE OBSERVED.

Due to the technical limitations of the print process, these colour swatches should serve as a guide only. We accept no responsibility for colour variation, and advise clients to consult the product's data sheet prior to use. Morrells products are intended for professional use only.

## A typical finishing system:

- 1 coat **omnia** preserve  
A waterborne timber treatment which protects against rot and fungal attack
- 2 coats **omnia** clear  
A clear topcoat with hybrid-microporous polymer technology which allows the timber to breathe and protects against the elements

## Products:

- |                                    |               |
|------------------------------------|---------------|
| <b>omnia</b> preserve clear        | code 8PR/000  |
| <b>omnia</b> clear satin 30% sheen | code 8C3/000  |
| <b>omnia</b> clear gloss 60% sheen | code 8C6/000  |
| <b>omnia</b> knotting              | code 3032/000 |

*omnia* preserve is also available in the wood stain colours shown opposite. **omnia** knotting should be used when coating softwoods.

**omnia** clear finish meets **BS EN 927/6** and **BS EN 927/3**.

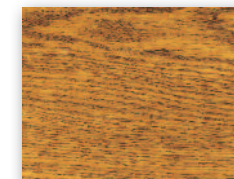

**omnia** preserve meets **BS 355 Hazard Classes 2,3&4**.

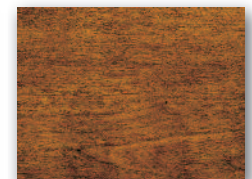

**Clear**  
code: 8PR/000

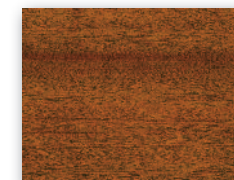

**Antique Pine**  
code: 8PR/001

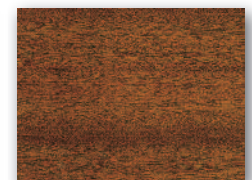

**Light Oak**  
code: 8PR/002

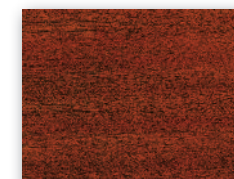

**Teak**  
code: 8PR/003

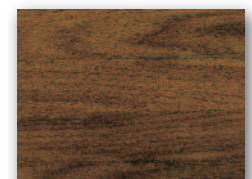

**Natural Mahogany**  
code: 8PR/004

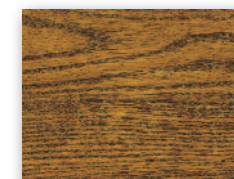

**Dark Mahogany**  
code: 8PR/005

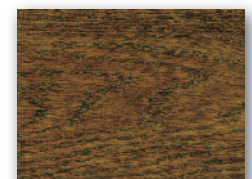

**Rosewood**  
code: 8PR/006

**Walnut**  
code: 8PR/007

**Dark Oak**  
code: 8PR/008

**Jacobean**  
code: 8PR/009

# Opaque finishing

**omnia** colours are ultra-smooth weather resistant waterborne coatings.

Morrells' coatings technology breakthrough provides:

- hybrid micro-porosity
- ultimate UV ray resistance
- superior gloss retention
- ultra-smooth finish

RAL & NCS colours or your own specified shades, through nationwide distribution.

**OMNIA PRIME AND OMNIA COLOURS ARE SPRAYED USING AAA EQUIPMENT TO A MINIMUM OF 150 MICRONS WET FILM THICKNESS PER COAT.**

FOR FACTORY FINISHING ONLY.

THE APPROPRIATE RESPIRATORY PROTECTION MUST BE WORN DURING APPLICATION AND ALL HEALTH & SAFETY REQUIREMENTS MUST BE OBSERVED.

#### A typical finishing system:

- 1 coat **omnia** prime  
A waterborne white primer which blocks and locks-in extractive staining
- 2 coats **omnia** colour  
A waterborne weather resistant topcoat with an ultra-smooth finish

#### Products:

<b>omnia</b> prime	code 8WP/000
<b>omnia</b> white satin 30% sheen	code 8W3/000
<b>omnia</b> white gloss 60% sheen	code 8W6/000
<b>omnia</b> colour 30% or 60% sheen	code 8W/____

**omnia** knotting, code 3032/000, and **omnia** preserve, code 8PR/000, should be used when coating softwoods.

**omnia** opaque finishing systems meet **BS EN 927/6** and **BS EN 927/3**.
